Unit 3 - Magnetosphere Watercolor Activity

VISUAL AID: “Particles Travel Magnetotail”

Most particles from the sun that reach Earth in the solar wind get to Earth’s geomagnetic poles through the magnetotail.

Magnetotail

Unit 3 - Magnetosphere Watercolor Activity VISUAL AID: “Particles Travel Magnetotail (Arrows)”

Particles from the sun carried by the solar wind enter Earth’s magnetosphere from many different directions. Most of those particles end up traveling to Earth’s geomagnetic poles through the magnetotail.
